

About Smart India Hackathon 2017:

MHRD along with different union ministries is hosting smart India Hackathon 2017 involving technology students from across the nation. Total 26 cities have been identified where in students will participate in Hackathon to solve challenges given by 29 union ministries concurrently during this 36-hour program. Almost each state is hosting the Hackathon based on challenges provided by one particular department. MHRD/AICTE has selected Ahmadabad as one of the host centre which will have to host about 55 teams comprising 440 students coming from across the nation who will work on challenges provided by **ISRO**. As a part of this Gujarat Technical University and Gujarat University are hosting the Hackathon based on challenges provided by ISRO in Ahmadabad on 1st and 2nd April 2017. This program will be hosted at Gujarat university convention hall in Ahmadabad.
